

VIRTUSHERITAGE

COMPANY PROFILE

Virtus Heritage is an Australian company that provides specialist expertise in archaeology, history and heritage management.

Our team has extensive experience throughout Australia and overseas in the investigation, assessment and management of archaeological sites and cultural landscapes, including through the use of Ground Penetrating Radar (GPR) and drone technologies. We work with local communities, commercial clients and statutory agencies to develop effective solutions and positive heritage outcomes for each project.

Our main office is located in Pottsville, Northern NSW with a secondary office in Newcastle, NSW and supported by our archaeologists and team members on the Gold Coast and Toowoomba in Queensland.

Our interdisciplinary team, affiliations and technical partnerships across Australia and with world leading experts allow us to match each project with the necessary academic skills, professional experience and local expertise.

Our heritage advice and reports are prepared by experienced professionals and communicated clearly balancing statutory reporting and legislative requirements, client needs and community expectations. We employ high end visual design to provide our clients and communities with visual and interpretative summaries of archaeology - an approach that is recognised as best practice in our field.

We build strong relationships with the Indigenous communities we work with and our proud to support the national reconciliation movement through our Reconciliation Action Plan (RAP).

We believe that heritage is integral to community wellbeing and identity, the valued stories, places and material culture that we pass down to future generations. Cultural heritage management and archaeological investigations play an important part in recording, assessing and interpreting material culture, stories and places that are valued by communities as part of their heritage and history. It is our privilege to work as archaeologists with clients and communities to develop assessments and investigations which not only comply with regulatory requirements but also recognise the links between people and place, providing ethical and practical heritage outcomes.
